1. Organization and Significant Accounting Policies

Nature of Operations

First Trinity Financial Corporation (the “Company” or “FTFC”) is the parent holding company of Trinity Life Insurance Company (“TLIC”), Family Benefit Life Insurance Company (“FBLIC”) and First Trinity Capital Corporation (“FTCC”). The Company was incorporated in Oklahoma on April 19, 2004, for the primary purpose of organizing a life insurance subsidiary.

The Company owns 100% of TLIC. TLIC owns 100% of FBLIC. TLIC and FBLIC are primarily engaged in the business of marketing, underwriting and distributing a broad range of individual life insurance and annuity products to individuals. TLIC’s and FBLIC’s current product portfolio consists of a modified premium whole life insurance policy with a flexible premium deferred annuity rider, whole life, term, final expense, accidental death and dismemberment and annuity products. The term products are both renewable and convertible and issued for 10, 15, 20 and 30 years. They can be issued with premiums fully guaranteed for the entire term period or with a limited premium guarantee. The final expense is issued as either a simplified issue or as a graded benefit, determined by underwriting. The TLIC and FBLIC products are sold through independent agents. TLIC is licensed in the states of Illinois, Kansas, Kentucky, Nebraska, North Dakota, Ohio, Oklahoma and Texas. FBLIC is licensed in the states of Alabama, Arizona, Arkansas, Colorado, Georgia, Illinois, Indiana, Kansas, Kentucky, Louisiana, Michigan, Mississippi, Missouri, Nebraska, New Mexico, North Carolina, North Dakota, Ohio, Oklahoma, Pennsylvania, South Dakota, Tennessee, Texas, Utah, Virginia and West Virginia.

The Company owns 100% of FTCC that was incorporated in 2006, and began operations in January 2007. FTCC provided financing for casualty insurance premiums for individuals and companies and was licensed to conduct premium financing business in the states of Alabama, Arkansas, Louisiana, Mississippi and Oklahoma. FTCC has made no premium financing loans since June 30, 2012.

Company Capitalization

The Company raised \$1,450,000 from two private placement stock offerings during 2004 and \$25,669,480 from two public stock offerings and one private placement stock offering from June 22, 2005 through February 23, 2007; June 29, 2010 through April 30, 2012 and August 15, 2012 through March 8, 2013. The Company issued 7,347,488 shares of its common stock and incurred \$3,624,518 of offering costs during these private placements and public stock offerings. The Company also issued 702,685 shares of its common stock in connection with two stock dividends paid to shareholders in 2011 and 2012 that resulted in accumulated earnings being charged \$5,270,138 with an offsetting credit of \$5,270,138 to common stock and additional paid-in capital.

The Company has also purchased 247,580 shares of treasury stock at a cost of \$893,947 from former members of the Board of Directors including the former Chairman of the Board of Directors, a former agent, the former spouse of the Company’s Chairman, Chief Executive Officer and President and a charitable organization where a former member of the Board of Directors had donated shares of the Company’s common stock.

Acquisitions

On December 23, 2008, FTFC acquired 100% of the outstanding common stock of First Life America Corporation (“FLAC”) from an unaffiliated company. The acquisition of FLAC was accounted for as a purchase. The aggregate purchase price for FLAC was \$2,695,234 including direct cost associated with the acquisition of \$195,234. The acquisition of FLAC was financed with the working capital of FTFC.

On December 31, 2008, FTFC made FLAC a 15 year loan in the form of a surplus note in the amount of \$250,000 with an interest rate of 6% payable monthly, that was approved by the Oklahoma Insurance Department (“OID”). This surplus note is eliminated in consolidation.

On August 31, 2009, two of the Company’s subsidiaries, Trinity Life Insurance Company (“Old TLIC”) and FLAC, were merged, with FLAC being the surviving company. Immediately following the merger, FLAC changed its name to TLIC.

1. Organization and Significant Accounting Policies (continued)

On December 28, 2011, TLIC acquired 100% of the outstanding common stock of FBLIC from FBLIC's shareholders. The acquisition of FBLIC was accounted for as a purchase. The aggregate purchase price for the acquisition of FBLIC was \$13,855,129. The acquisition of FBLIC was financed with the working capital of TLIC.

On April 28, 2015, the Company acquired a block of life insurance policies and annuity contracts according to the terms of an assumption reinsurance agreement. The Company acquired assets of \$3,644,839 (including cash), assumed liabilities of \$3,055,916 and recorded a gain on reinsurance assumption of \$588,923.

Basis of Presentation

The accompanying unaudited consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America ("U.S. GAAP") for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by U.S. GAAP for complete financial statements. In the opinion of management, all adjustments (consisting primarily of normal recurring accruals) considered necessary for a fair presentation of the results for the interim periods have been included.

The results of operations for the six months ended June 30, 2018 are not necessarily indicative of the results to be expected for the year ended December 31, 2018 or for any other interim period or for any other future year. Certain financial information which is normally included in notes to consolidated financial statements prepared in accordance with U.S. GAAP, but which is not required for interim reporting purposes, has been condensed or omitted. The accompanying consolidated financial statements and notes thereto should be read in conjunction with the financial statements and notes thereto included in the Company's report on Form 10-K for the year ended December 31, 2017.

Principles of Consolidation

The consolidated financial statements include the accounts and operations of the Company and its subsidiaries. All intercompany accounts and transactions are eliminated in consolidation.

Reclassifications

Certain reclassifications have been made in the prior year and prior quarter financial statements to conform to current year and current quarter classifications. These reclassifications had no effect on previously reported net income or shareholders' equity.

Use of Estimates

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Although these estimates are based on management's knowledge of current events and actions it may undertake in the future, they may ultimately differ from actual results.

Common Stock

Common stock is fully paid, non-assessable and has a par value of \$.01 per share.

Treasury Stock

Treasury stock, representing shares of the Company's common stock that have been reacquired after having been issued and fully paid, is recorded at the reacquisition cost and the shares are no longer outstanding.

Recent Accounting Pronouncements

Revenue from Contracts with Customers

In May 2014, the FASB issued updated guidance to clarify the principles for recognizing revenue. While insurance contracts are not within the scope of this updated guidance, the Company's fee income related to providing services will be subject to this updated guidance. The updated guidance requires an entity to recognize revenue as performance obligations are met, in order to reflect the transfer of promised goods or services to customers in an amount that reflects the consideration the entity is entitled to receive for those goods or services. The following steps are applied in the updated guidance: (1) identify the contract(s) with a customer; (2) identify the performance obligations in the contract; (3) determine the transaction price; (4) allocate the transaction price to the performance obligations in the contract and (5) recognize revenue when, or as, the entity satisfies a performance obligation. In July 2015, the FASB deferred the effective date of the updated guidance on revenue recognition by one year to the quarter ending March 31, 2018. The adoption of this guidance did not have a material effect on the Company's result of operations, financial position or liquidity.

Recognition and Measurement of Financial Assets and Financial Liabilities

In January 2016, the FASB issued updated guidance regarding financial instruments. This guidance intends to enhance reporting for financial instruments and addresses certain aspects of recognition, measurement, presentation and disclosure of financial instruments. The significant amendments in this update generally require equity investments to be measured at fair value with changes in fair value recognized in net income, require the use of an exit price notion when measuring the fair value of financial instruments for disclosure purposes and clarifies that an entity should evaluate the need for a valuation allowance on a deferred tax asset related to available-for-sale securities. This guidance also intends to enhance the presentation of certain fair value changes for financial liabilities measured at fair value. It also amends certain disclosure requirements associated with the fair value of financial instruments.

This guidance is effective for fiscal years beginning after December 15, 2017. The recognition and measurement provisions of this guidance was applied by means of a cumulative-effect adjustment to the balance sheet as of the beginning of the fiscal year of adoption and early adoption is not permitted. The adoption of this guidance did not have a material effect on the Company's result of operations, financial position or liquidity.

Leases

In February 2016, the FASB issued updated guidance regarding leases that generally requires the lessee and lessor to recognize lease assets and lease liabilities on the statement of financial position. A lessee should recognize on the statement of financial position a liability to make lease payments and an asset representing its right-to-use the underlying assets for the lease term. Optional payments to extend the lease or purchase the underlying leased asset should be included in the measurement of lease assets and lease liabilities only if the lessee is reasonably certain to exercise the option(s).

If the lease has a term of 12 months or less, a lessee can make an election to recognize lease expenses for such leases on a straight-line basis over the lease term. There is a differentiation between finance leases and operating leases for the lessee in the statements of operations and cash flows. Finance leases recognize interest on the lease liability separately from the right-to-use the asset whereas an operating lease recognizes a single lease cost allocated over the lease term on a generally straight-line basis. All cash payments are within operating activities in the statement of cash flows except finance leases classify repayments of the principal portion of the lease liability within financing activities.

1. Organization and Significant Accounting Policies (continued)

The accounting applied by the lessor is largely unchanged from that applied under previous U.S. GAAP. Key aspects of the lessor accounting model, however, were aligned with the revenue recognition guidance of Codification Topic 606. The previous accounting model for leverage leases continues to apply only to those leveraged leases that commenced before the effective date of Codification Update 2016-02 Leases (Topic 842).

Entities will generally continue to account for leases that commenced before the effective date of this update in accordance with previous U.S. GAAP unless the lease is modified. Lessees are required to recognize a right-of-use asset and a lease liability for all operating leases at each reporting date based on the present value of the remaining minimal rental payments that were tracked and disclosed under previous U.S. GAAP. The updated guidance may be applied using a modified retrospective approach effective for annual and interim periods beginning after December 15, 2018. In July 2018, the FASB issued updated guidance (Accounting Standards Update 2018-11) that provides entities with an additional (and optional) transition method to adopt the new standard on leases. Under this new transition method, an entity initially applies the new standard on leases at the adoption date and recognizes a cumulative-effect adjustment to the opening balance of retained earnings in the period of adoption. Consequently, an entity's reporting for the comparative periods presented in the financial statements in which it adopts the new standard on leases will continue to be in accordance with current GAAP (Topic 840, Leases). An entity that elects this additional (and optional) transition method must provide the required Topic 840 disclosures for all periods that continue to be in accordance with Topic 840. Early adoption is permitted. The adoption of this guidance is not expected to have a material effect on the Company's results of operations, financial position or liquidity.

Financial Instruments — Credit Losses: Measurement of Credit Losses on Financial Instruments

In June 2016, the FASB issued updated guidance for the accounting for credit losses for financial instruments. The updated guidance applies a new credit loss model (current expected credit losses or CECL) for determining credit-related impairments for financial instruments measured at amortized cost (e.g. mortgage loans and reinsurance amounts recoverable) and requires an entity to estimate the credit losses expected over the life of an exposure or pool of exposures. The estimate of expected credit losses should consider historical information, current information, as well as reasonable and supportable forecasts, including estimates of prepayments. The expected credit losses, and subsequent adjustments to such losses, will be recorded through an allowance account that is deducted from the amortized cost basis of the financial asset, with the net carrying value of the financial asset presented on the consolidated balance sheet at the amount expected to be collected.

The updated guidance also amends the current other-than-temporary impairment model for available-for-sale debt securities by requiring the recognition of impairments relating to credit losses through an allowance account and limits the amount of credit loss to the difference between a security's amortized cost basis and its fair value. In addition, the length of time a security has been in an unrealized loss position will no longer impact the determination of whether a credit loss exists.

The updated guidance is effective for reporting periods beginning after December 15, 2019. Early adoption is permitted for reporting periods beginning after December 15, 2018. Based on the financial instruments currently held by the Company, the Company expects there would not be a material effect on the Company's results of operations, financial position or liquidity if the new guidance were able to be adopted in the current accounting period. The impact on the Company's results of operations, financial position or liquidity at the date of adoption of the updated guidance will be determined by the financial instruments held by the Company and the economic conditions at that time.

Statement of Cash Flows – Classification of Certain Cash Receipts and Cash Payments

In August 2016, the FASB issued specific guidance to reduce the existing diversity in practice in how eight specific cash flow issues of certain cash receipts and cash payments are presented and classified in the statement of cash flows. The updated guidance is effective for annual and interim periods beginning after December 15, 2017, and is to be applied retrospectively. Early adoption is permitted. The adoption of this guidance did not have a material effect on the Company's cash flows statement.

Statement of Cash Flows – Classification of Certain Cash Receipts and Cash Payments

In November 2016, the FASB issued specific guidance on the cash flow classification and presentation of changes in restricted cash or restricted cash equivalents when there are transfers between cash, cash equivalents and restricted cash or restricted cash equivalents and when there are direct cash receipts into restricted cash or restricted cash equivalents or direct cash payments made from restricted cash or restricted cash equivalents.

The updated guidance is effective for annual and interim periods beginning after December 15, 2017, and is to be applied retrospectively. Early adoption is permitted. The adoption of this guidance did not have a material effect on the Company's results of operations, financial position or liquidity.

Business Combinations – Clarifying the Definition of a Business

In January 2017, the FASB issued guidance to clarify the definition of a business to assist reporting entities in evaluating whether transactions should be accounted for as an acquisition or disposal of assets or businesses. This update provides a screen to determine when an integrated set of assets or activities is not a business and the requirements to be met to be considered a business.

The updated guidance is effective for annual and interim periods beginning after December 15, 2017, and is to be applied retrospectively. Early adoption is permitted in certain situations. The adoption of this guidance did not have a material effect on the Company's results of operations, financial position or liquidity.

Intangibles – Goodwill and Other - Simplifying the Test for Goodwill Impairment

In January 2017, the FASB issued guidance to modify the concept of impairment from the condition that exists when the carrying amount of goodwill exceeds its implied value to the condition that exists when the carrying amount of a reporting unit exceeds its fair value. Reporting entities will no longer determine goodwill impairment by calculating the implied fair value of goodwill by assigning the fair value of a reporting unit to all of its assets and liabilities as if that reporting unit had been acquired in a business combination. The updated guidance is effective for annual and interim periods beginning after December 15, 2019, and is to be applied prospectively. Early adoption is permitted for interim or annual goodwill impairment tests performed on testing dates after January 1, 2017. The adoption of this guidance is not expected to have a material effect on the Company's results of operations, financial position or liquidity.

Compensation — Retirement Benefits: Improving the Presentation of Net Periodic Pension Cost and Net Periodic Postretirement Benefit Cost

In March 2017, the FASB issued updated guidance to improve the presentation of net periodic pension cost and net periodic post retirement cost (net benefit costs). Net benefit costs comprise several components that reflect different aspects of an employer's financial arrangements as well as the cost of benefits provided to employees. The update requires that the employer service cost component be reported in the same lines as other employee compensation cost and that the other components (non-service costs) be presented separately from the service cost and outside of a subtotal of income from operations if one is presented. The update also allows only the service cost component to be eligible for capitalization in assets when applicable.

The updated guidance is effective for reporting periods beginning after December 15, 2017. The update is to be applied retrospectively with respect to the presentation of service cost and non-service cost and prospectively with respect to applying the service cost only eligible for capitalization in assets guidance. Early adoption is permitted as of the first interim period of an annual period if an entity issues interim financial statements. This pronouncement did not impact the Company since it does not have any pension or postretirement benefit plans and has no intention to adopt such plans.

Compensation — Stock Compensation: Scope of Modification Accounting

In May 2017, the FASB issued updated guidance related to a change to the terms or conditions (modification) of a share-based payment award. The updated guidance provides that an entity should account for the effects of a modification unless the fair value and vesting conditions of the modified award and the classification of the modified award (equity or liability instrument) are the same as the original award immediately before the modification.

The updated guidance is effective for the quarter ending March 31, 2018. The update is to be applied prospectively to an award modified on or after the adoption date. Early adoption is permitted in any interim periods for which financial statements have not yet been made available for issuance. The adoption of this guidance did not have a material effect on the Company's results of operations, financial position or liquidity.

Target Improvement to Accounting for Hedging Activities

In August 2017, the FASB issued updated authoritative guidance for the application of hedge accounting. The updated guidance updates certain recognition and measurement requirements for hedge accounting. The objective of the guidance is to more closely align the economics of a company's risk management activities in its financial results and reduce the complexity of applying hedge accounting. The updates include the expansion of hedging strategies that are eligible for hedge accounting, elimination of the separate measurement and reporting of hedge ineffectiveness, presentation of the changes in the fair value of the hedging instrument in the same consolidated statement of operations line as the earnings effect of the hedged item and simplification of hedge effectiveness assessments. This guidance also includes new disclosures and will be applied using a modified retrospective approach by recording a cumulative-effect adjustment to retained earnings as of the beginning of the fiscal year of adoption.

The updated guidance is effective for reporting periods beginning after December 15, 2018. Early adoption is permitted for reporting periods beginning before December 15, 2018. The Company does not currently and does not intend to participate in hedging activities and there is therefore no impact on the Company's results of operations, financial position or liquidity. This pronouncement would be adopted if the Company begins to participate in hedging activities in the future.

Reclassification of Certain Tax Effects from Accumulated Other Comprehensive Income

On February 14, 2018, the FASB issued updated guidance that allows a reclassification of the stranded tax effects in accumulated other comprehensive income resulting from the Tax Cuts and Jobs Act of 2017. Current guidance requires the effect of a change in tax laws or rates on deferred tax balances to be reported in income from continuing operations in the accounting period that includes the period of enactment, even if the related income tax effects were originally charged or credited directly to accumulated other comprehensive income. The amount of the reclassification would include the effect of the change in the U.S. federal corporate income tax rate on the gross deferred tax amounts and related valuation allowances, if any, at the date of the enactment of the Tax Cuts and Jobs Act of 2017 related to items in accumulated other comprehensive income. The updated guidance is effective for reporting periods beginning after December 15, 2018 and is to be applied retrospectively to each period in which the effect of the Tax Cuts and Jobs Act of 2017 related to items remaining in accumulated other comprehensive income are recognized or at the beginning of the period of adoption. Early adoption is permitted.

The Company adopted the updated guidance effective December 31, 2017. The adoption of this guidance did not have a material effect on the Company's result of operations, financial position or liquidity.

2. Investments (continued)

As of June 30, 2018, the Company held 279 available-for-sale fixed maturity securities with an unrealized loss of \$2,508,071, fair value of \$74,208,239 and amortized cost of \$76,716,310. These unrealized losses were primarily due to market interest rate movements in the bond market as of June 30, 2018. The ratio of the fair value to the amortized cost of these 279 securities is 97%.

As of December 31, 2017, the Company held 67 available-for-sale fixed maturity securities with an unrealized loss of \$749,996, fair value of \$16,550,979 and amortized cost of \$17,300,975. These unrealized losses were primarily due to market interest rate movements in the bond market as of December 31, 2017. The ratio of the fair value to the amortized cost of these 67 securities is 96%.

As of June 30, 2018, the Company held one preferred stock with an unrealized loss of \$2,200, fair value of \$47,800 and cost of \$50,000. The ratio of fair value to cost of this preferred stock is 96%.

As of June 30, 2018, the Company held one equity security with an unrealized loss of \$11,892, fair value of \$80,090 and cost of \$91,982. The ratio of fair value to cost of this security is 87%.

As of December 31, 2017, the Company had no equity securities and preferred stock with unrealized losses.

Fixed maturity securities were 94% and 93% investment grade as rated by Standard & Poor's as of June 30, 2018 and December 31, 2017, respectively.

The Company's decision to record an impairment loss is primarily based on whether the security's fair value is likely to remain significantly below its book value based on all of the factors considered. Factors that are considered include the length of time the security's fair value has been below its carrying amount, the severity of the decline in value, the credit worthiness of the issuer, and the coupon and/or dividend payment history of the issuer. The Company also assesses whether it intends to sell or whether it is more likely than not that it may be required to sell the security prior to its recovery in value.

For any fixed maturity securities that are other-than-temporarily impaired, the Company determines the portion of the other-than-temporary impairment that is credit-related and the portion that is related to other factors. The credit-related portion is the difference between the expected future cash flows and the amortized cost basis of the fixed maturity security, and that difference is charged to earnings. The non-credit-related portion representing the remaining difference to fair value is recognized in other comprehensive income (loss). Only in the case of a credit-related impairment where management has the intent to sell the security, or it is more likely than not that it will be required to sell the security before recovery of its cost basis, is a fixed maturity security adjusted to fair value and the resulting losses recognized in realized gains (losses) in the consolidated statements of operations. Any other-than-temporary impairments on equity securities are recorded in the consolidated statements of operations in the periods incurred as the difference between fair value and cost.

The Company has recorded other-than-temporary impairments on its fixed maturity available-for-sale investment in an energy corporation with a total par value of \$650,000 as a result of continuing unrealized losses. During fourth quarter 2016 this security was initially impaired by a \$207,450 charge to the statement of operations. During second quarter 2017 this security was further impaired by a \$224,250 charge to the statement of operations. These impairments were considered fully credit-related and represent the difference between the amortized cost basis of the security and its fair value. The Company experienced no additional other-than-temporary impairments on fixed maturity available-for-sale securities for the three and six months ended June 30, 2018 and the year ended December 31, 2017.

Management believes that the Company will fully recover its cost basis in the securities held as of June 30, 2018, and management does not have the intent to sell nor is it more likely than not that the Company will be required to sell such securities until they recover or mature. The remaining temporary impairments shown herein are primarily the result of the current interest rate environment rather than credit factors that would imply other-than-temporary impairment.

TLIC owns approximately six and one-half acres of land located in Topeka, Kansas that includes a 20,000 square foot office building on approximately one-fourth of this land. This building and land on one of the four lots is held for the production of income. The other three lots of land owned in Topeka, Kansas are held for investment. In addition, FBLIC owns one-half acre of undeveloped land located in Jefferson City, Missouri.

During 2018 the Company foreclosed on residential mortgage loans of real estate totaling \$378,411 and transferred those properties to investment real estate held for sale. During 2018, the Company sold investment real estate property with an aggregate carrying value of \$56,175. The Company recorded a gross realized investment loss on sale of \$1,322 based on an aggregate sales price of \$54,853.

2. Investments (continued)

During 2017, the Company sold investment real estate property with an aggregate carrying value of \$185,702. The Company recorded a gross realized investment gain on sale of \$4,382 based on an aggregate sales price of \$190,084.

3. Fair Value Measurements

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability (an exit price) on the measurement date. The Company also considers the impact on fair value of a significant decrease in volume and level of activity for an asset or liability when compared with normal activity.

The Company holds fixed maturity, preferred stock and equity securities that are measured and reported at fair market value on the statement of financial position. The Company determines the fair market values of its financial instruments based on the fair value hierarchy that requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The standard describes three levels of inputs that may be used to measure fair value, as follows:

Level 1 - Quoted prices in active markets for identical assets or liabilities. The Company's Level 1 assets include preferred stock and equity securities that are traded in an active exchange market.

Level 2 - Observable inputs other than Level 1 prices such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities. The Company's Level 2 assets and liabilities include fixed maturity securities with quoted prices that are traded less frequently than exchange-traded instruments or assets and liabilities whose value is determined using a pricing model with inputs that are observable in the market or can be derived principally from or corroborated by observable market data. This category generally includes U.S. Government and agency mortgage-backed debt securities, state and political subdivision securities, corporate debt securities and foreign debt securities.

Level 3 - Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities. The Company's Level 3 assets and liabilities include financial instruments whose value is determined using pricing models, discounted cash flow methodologies, or similar techniques, as well as instruments for which the determination of fair value requires significant management judgment or estimation. This category generally includes certain private equity investments where independent pricing information was not able to be obtained for a significant portion of the underlying assets.

The Company has categorized its financial instruments, based on the priority of the inputs to the valuation technique, into the three-level fair value hierarchy. If the inputs used to measure the financial instruments fall within different levels of the hierarchy, the categorization is based on the lowest level input that is significant to the fair value measurement of the instrument.

A review of fair value hierarchy classifications is conducted on a quarterly basis. Changes in the valuation inputs, or their ability to be observed, may result in a reclassification for certain financial assets or liabilities. Reclassifications impacting Level 3 of the fair value hierarchy are reported as transfers in and out of the Level 3 category as of the beginning of the period in which the reclassifications occur.

As of June 30, 2018 and December 31, 2017, Level 3 financial instruments consisted of two private placement common stocks that have no active trading and a joint venture investment with a mortgage loan originator.

These private placement stocks represent investments in small insurance holding companies. The fair value for these securities was determined through the use of unobservable assumptions about market participants. The Company has assumed a willing market participant would purchase the securities for the same price as the Company paid until such time as these small insurance holding companies commence significant operations. The joint venture investment with a mortgage loan originator is accounted for under the equity method of accounting.

3. Fair Value Measurements (continued)

Fair values for Level 1 and Level 2 assets for the Company's fixed maturity and preferred stock available-for-sale and equity securities are primarily based on prices supplied by a third party investment service. The third party investment service provides quoted prices in the market which use observable inputs in developing such rates.

The Company analyzes market valuations received to verify reasonableness and to understand the key assumptions used and the sources. Since the fixed maturity securities owned by the Company do not trade on a daily basis, the third party investment service prepares estimates of fair value measurements using relevant market data, benchmark curves, sector groupings and matrix pricing. As the fair value estimates of the Company's fixed maturity securities are based on observable market information rather than market quotes, the estimates of fair value on these fixed maturity securities are included in Level 2 of the hierarchy. The Company's Level 2 investments include obligations of U.S. government, U.S. government agencies, state and political subdivisions, mortgage-backed securities, corporate bonds, asset-backed and foreign bonds.

The Company's preferred stock is included in Level 1 and equity securities are included in Level 1 and Level 2 and the private placement common stocks and joint venture investment are included in Level 3. Level 1 for the preferred stock and those equity securities classified as such is appropriate since they trade on a daily basis, are based on quoted market prices in active markets and are based upon unadjusted prices. Level 2 for those equity securities classified as such is appropriate since they are not actively traded.

The Company's fixed maturity and preferred stock available-for-sale and equity securities portfolio is highly liquid and allows for a high percentage of the portfolio to be priced through pricing services.

3. Fair Value Measurements (continued)

The estimated fair value amounts have been determined using available market information and appropriate valuation methodologies. However, considerable judgment was required to interpret market data to develop these estimates. Accordingly, the estimates are not necessarily indicative of the amounts which could be realized in a current market exchange. The use of different market assumptions or estimation methodologies may have a material effect on the fair value amounts.

The following methods and assumptions were used in estimating the fair value disclosures for financial instruments in the accompanying financial statements and notes thereto:

Mortgage Loans on Real Estate

The fair values for mortgage loans are estimated using discounted cash flow analyses. For residential mortgage loans, the discount rate used was indexed to the LIBOR yield curve adjusted for an appropriate credit spread. For commercial and industrial mortgage loans, the discount rate used was assumed to be the interest rate on the last commercial and industrial mortgage acquired by the Company.

Cash and Cash Equivalents, Short-Term Investments, Accrued Investment Income and Policy Loans

The carrying value of these financial instruments approximates their fair values. Cash and cash equivalents and short-term investments are included in Level 1 of the fair value hierarchy due to their highly liquid nature.

Other Long-Term Investments

Other long-term investments are comprised of lottery prize receivables and fair value is derived by using a discounted cash flow approach. Projected cash flows are discounted using the average Citigroup Pension Liability Index in effect at the end of each period.

Investment Contracts – Policyholders’ Account Balances

The fair value for liabilities under investment-type insurance contracts (accumulation annuities) is calculated using a discounted cash flow approach. Cash flows are projected using actuarial assumptions and discounted to the valuation date using risk-free rates adjusted for credit risk and the nonperformance risk of the liabilities.

The fair values for insurance contracts other than investment-type contracts are not required to be disclosed.

Policy Claims

The carrying amounts reported for these liabilities approximate their fair value.

4. Segment Data

The Company has a life insurance segment, consisting of the life insurance operations of TLIC and FBLIC, an annuity segment, consisting of the annuity operations of TLIC and FBLIC and a corporate segment. Results for the parent company and the operations of FTCC, after elimination of intercompany amounts, are allocated to the corporate segment. These segments as of June 30, 2018 and December 31, 2017 and for the three and six months ended June 30, 2018 and 2017 are summarized as follows:

5. Federal Income Taxes

The provision for federal income taxes is based on the asset and liability method of accounting for income taxes. Deferred income taxes are provided for the cumulative temporary differences between balances of assets and liabilities determined under GAAP and the balances using tax bases.

The Company has no known uncertain tax benefits within its provision for income taxes. In addition, the Company does not believe it would be subject to any penalties or interest relative to any open tax years and, therefore, has not accrued any such amounts. The Company files U.S. federal income tax returns and income tax returns in various state jurisdictions. The 2014 through 2017 U.S. federal tax years are subject to income tax examination by tax authorities. The Company classifies any interest and penalties (if applicable) as income tax expense in the financial statements.

6. Legal Matters and Contingent Liabilities

A lawsuit filed by the Company and Chairman, President and Chief Executive Officer, Gregg E. Zahn, against former Company Board of Directors member Wayne Pettigrew and Mr. Pettigrew's company, Group & Pension Planners, Inc. (the "Defendants"), concluded on February 17, 2017. The lawsuit was filed in the District Court of Tulsa County, Oklahoma (Case No. CJ-2013-03385). In the lawsuit, the Company alleged that Mr. Pettigrew had defamed the Company by making untrue statements to certain shareholders of the Company, to the press and to regulators of the state of Oklahoma and had breached his fiduciary duties.

The jury concluded that Mr. Pettigrew, while still a member of the Company's Board of Directors, did, in fact, make untrue statements regarding the Company and Mr. Zahn and committed breaches of his fiduciary duties to the Company and the jury awarded the Company \$800,000 of damages against Mr. Pettigrew. In addition, the jury found that Mr. Pettigrew had defamed Mr. Zahn and intentionally inflicted emotional distress on Mr. Zahn and awarded Mr. Zahn \$3,500,000 of damages against Mr. Pettigrew. In addition to the damages awarded by the jury, the Company and Mr. Zahn have initiated steps to aggressively communicate the correction of the untrue statements to outside parties.

Mr. Pettigrew has appealed this decision but has failed to post an appeal bond. As a consequence, the Company and Mr. Zahn are in the process of executing on the judgments against Mr. Pettigrew's assets. The Company and Mr. Zahn have so far collected some property and money in the execution process and will continue to execute on the judgments. Any money or property collected to date during the execution of the judgments are held in an escrow by a third party, have not been reflected in the June 30, 2018 consolidated financial statements and would have to be returned to Mr. Pettigrew in the event the judgments are reversed by the appellate courts.

Prior to being acquired by TLIC, FBLIC developed, marketed, and sold life insurance products known as "Decreasing Term to 95" policies. On January 17, 2013, FBLIC's Board of Directors voted that, effective March 1, 2013, it was not approving, and therefore was not providing, a dividend for the Decreasing Term to 95 policies. On November 22, 2013, a lawsuit was filed in the Circuit Court of Greene County, Missouri asserting claims against FBLIC relating to this decision. A trial was held November 27, 2017 through December 1, 2017 on the individual claims of two policyholders asserting fraud and negligent misrepresentation and on claims of a class of Missouri residents asking the Court to (1) find that the dividend provisions in the Decreasing Term to 95 policies violate Missouri law, specifically, § 376.360 RSMo.; (2) order that the policies are void ab initio; and (3) order that FBLIC return all premiums collected under these policies, plus interest and attorneys' fees.

During 2018, a settlement was reached by the parties and the Court approved the settlement agreement on June 11, 2018. FBLIC paid \$1.85 million to resolve all class and individual claims and all active Decreasing Term to 95 policies for individuals in the class will be cancelled.

Guaranty fund assessments, brought about by the insolvency of life and health insurers, are levied at the discretion of the various state guaranty fund associations to cover association obligations. In most states, guaranty fund assessments may be taken as a credit against premium taxes, typically over a five-year period.

7. Line of Credit

Through June 30, 2018, the Company had a \$1.0 million line of credit with a bank to provide working capital and funds for expansion. The terms of the line of credit allowed for advances, repayments and re-borrowings through the maturity date of July 1, 2018. Any outstanding advances would have incurred interest at a variable interest rate of the prime rate set forth in the Wall Street Journal plus 1% per annum adjusting monthly based on a 360 day year. The Company did not utilize this line of credit during 2018 or 2017.

Total reclassification adjustments	<u>\$ 32,111</u>	<u>\$ (157,865)</u>	<u>\$ 31,187</u>	<u>\$ (26,650)</u>

(a) These items appear within net realized investment gains (losses) and other-than-temporary impairments in the consolidated statements of operations.

(b) These items appear within federal income taxes in the consolidated statements of operations.

9. Allowance for Loan Losses from Mortgage Loans on Real Estate

The allowance for possible loan losses from investments in mortgage loans on real estate is a reserve established through a provision for possible loan losses charged to expense which represents, in the Company's judgment, the known and inherent credit losses existing in the mortgage loan portfolio. The allowance, in the judgment of the Company, is necessary to reserve for estimated loan losses inherent in the mortgage loan portfolio and reduces the carrying value of investments in mortgage loans on real estate to the estimated net realizable value on the consolidated statement of financial position.

While the Company utilizes its best judgment and information available, the ultimate adequacy of the allowance is dependent upon a variety of factors beyond the Company's control, including the performance of the mortgage loan portfolio, the economy and changes in interest rates. The Company's allowance for possible mortgage loan consists of specific valuation allowances established for probable losses on specific loans and a portfolio reserve for probable incurred but not specifically identified loans.

Mortgage loans are considered impaired when, based on current information and events, it is probable that the Company will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the mortgage loan agreement. Factors considered by the Company in determining impairment include payment status, collateral value of the real estate subject to the mortgage loan, and the probability of collecting scheduled principal and interest payments when due. Mortgage loans that experience insignificant payment delays and payment shortfalls generally are not classified as impaired.

The Company determines the significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration all of the circumstances surrounding the mortgage loan and the borrower, including the length of the delay, the reasons for the delay, the borrower's prior payment record, and the amount of the shortfall in relation to the principal and interest owed. Impairment is measured on a loan-by-loan basis.

9. Allowance for Loan Losses from Mortgage Loans on Real Estate (continued)

As of June 30, 2018, \$599,645 of independent residential mortgage loans on real estate are held in escrow by a third party for the benefit of the Company. As of June 30, 2018, \$409,546 of that escrow amount is available to the Company as additional collateral on \$4,863,235 of advances to the loan originator. The remaining June 30, 2018 escrow amount of \$190,099 is available to the Company as additional collateral on its investment of \$38,019,842 in residential mortgage loans on real estate. In addition, the Company has an additional \$410,296 allowance for possible loan losses in the remaining \$82,004,074 of investments in mortgage loans on real estate as of June 30, 2018.

As of December 31, 2017, \$564,479 of independent residential mortgage loans on real estate are held in escrow by a third party for the benefit of the Company. As of December 31, 2017, \$394,978 of that escrow amount is available to the Company as additional collateral on \$4,925,259 of advances to the loan originator. The remaining December 31, 2017 escrow amount of \$169,501 is available to the Company as additional collateral on its investment of \$33,900,260 in residential mortgage loans on real estate. In addition, the Company has an additional \$342,815 allowance for possible loan losses in the remaining \$68,596,191 of investments in mortgage loans on real estate as of December 31, 2017.

The balances of and changes in the Company's credit losses related to mortgage loans on real estate as of and for the three and six months ended June 30, 2018 and 2017 are summarized as follows (excluding \$38,019,842 and \$31,407,826 of mortgage loans on real estate as of June 30, 2018 and 2017, respectively, with one loan originator where independent mortgage loan balances are held in escrow by a third party for the benefit of the Company):

Item 2: Management’s Discussion and Analysis of Financial Condition and Results of Operations

Overview

First Trinity Financial Corporation (“we” “us”, “our”, “FTFC” or the “Company”) conducts operations as an insurance holding company emphasizing ordinary life insurance products and annuity contracts in niche markets.

As an insurance provider, we collect premiums in the current period to pay future benefits to our policy and contract holders. Our core TLIC and FBLIC operations include issuing modified premium whole life insurance with a flexible premium deferred annuity, ordinary whole life, final expense, term and annuity products to predominately middle income households in the states of Alabama, Arizona, Arkansas, Colorado, Georgia, Illinois, Indiana, Kansas, Kentucky, Louisiana, Michigan, Mississippi, Missouri, Nebraska, New Mexico, North Carolina, North Dakota, Ohio, Oklahoma, Pennsylvania, South Dakota, Tennessee, Texas, Utah, Virginia and West Virginia through independent agents.

We also realize revenues from our investment portfolio, which is a key component of our operations. The revenues we collect as premiums from policyholders are invested to ensure future benefit payments under the policy contracts. Life insurance companies earn profits on the investment spread, which reflects the investment income earned on the premiums paid to the insurer between the time of receipt and the time benefits are paid out under policies. Changes in interest rates, changes in economic conditions and volatility in the capital markets can all impact the amount of earnings that we realize from our investment portfolio.

Acquisitions

The Company expects to facilitate growth through acquisitions of other life insurance companies and/or blocks of life insurance and annuity business. In late December 2008, the Company completed its acquisition of 100% of the outstanding stock of FLAC for \$2,500,000 and had additional acquisition related expenses of \$195,234.

In late December 2011, the Company completed its acquisition of 100% of the outstanding stock of FBLIC for \$13,855,129.

On April 28, 2015, the Company acquired a block of life insurance policies and annuity contracts according to the terms of an assumption reinsurance agreement and assumed liabilities of \$3,055,916.

Our profitability in the life insurance and annuity segments is a function of our ability to accurately price the policies that we write, adequately value life insurance business acquired, administer life insurance company acquisitions at an expense level that validates the acquisition cost and invest the premiums and annuity considerations in assets that earn investment income with a positive spread.

Coinsurance

Effective January 1, 2018, TLIC entered into an annuity coinsurance agreement with an offshore annuity and life insurance company whereby 90% of TLIC’s annuity considerations originated after December 31, 2017 were ceded to the assuming company. The assuming company contractually reimburses TLIC for the related commissions, withdrawals, settlements, interest credited, submission costs, maintenance costs, marketing costs and other costs plus a placement fee.

In accordance with this annuity coinsurance agreement, TLIC holds assets for the benefit of the assuming company in an amount at least equal to the annuity reserves in accordance with U.S. statutory accounting principles generated by this ceded business with a corresponding funds withheld liability recorded. In addition, the assuming company maintains a trust related to this ceded business amounting to at least an additional 4% of assets above the required annuity reserve required under U.S. statutory accounting principles. This coinsurance agreement may be terminated for new business by either party at any time upon 30 days prior written notice to the other party.

Critical Accounting Policies and Estimates

The discussion and analysis of our financial condition, results of operations and liquidity and capital resources is based on our consolidated financial statements that have been prepared in accordance with U.S. GAAP. Preparation of these financial statements requires us to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenue and expenses. We evaluate our estimates and assumptions continually, including those related to investments, deferred acquisition costs, allowance for loan losses from mortgages, value of insurance business acquired, policy liabilities, regulatory requirements, contingencies and litigation. We base our estimates on historical experience and on various other factors and assumptions that we believe are reasonable under the circumstances, the results of which form the basis for making judgments about the carrying value of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions.

For a description of the Company's critical accounting policies and estimates, please refer to "Item 7 - Management's Discussion and Analysis of Financial Condition and Results of Operations - Critical Accounting Policies and Estimates" in the Company's Annual Report on Form 10-K for the year ended December 31, 2017. The Company considers its most critical accounting estimates to be those applied to investments in fixed maturities, mortgage loans on real estate, deferred policy acquisition costs, value of insurance business acquired and future policy benefits. There have been no material changes to the Company's critical accounting policies and estimates since December 31, 2017.

Recent Accounting Pronouncements

Revenue from Contracts with Customers

In May 2014, the FASB issued updated guidance to clarify the principles for recognizing revenue. While insurance contracts are not within the scope of this updated guidance, the Company's fee income related to providing services will be subject to this updated guidance. The updated guidance requires an entity to recognize revenue as performance obligations are met, in order to reflect the transfer of promised goods or services to customers in an amount that reflects the consideration the entity is entitled to receive for those goods or services. The following steps are applied in the updated guidance: (1) identify the contract(s) with a customer; (2) identify the performance obligations in the contract; (3) determine the transaction price; (4) allocate the transaction price to the performance obligations in the contract and (5) recognize revenue when, or as, the entity satisfies a performance obligation. In July 2015, the FASB deferred the effective date of the updated guidance on revenue recognition by one year to the quarter ending March 31, 2018. The adoption of this guidance did not have a material effect on the Company's result of operations, financial position or liquidity.

Recognition and Measurement of Financial Assets and Financial Liabilities

In January 2016, the FASB issued updated guidance regarding financial instruments. This guidance intends to enhance reporting for financial instruments and addresses certain aspects of recognition, measurement, presentation and disclosure of financial instruments. The significant amendments in this update generally require equity investments to be measured at fair value with changes in fair value recognized in net income, require the use of an exit price notion when measuring the fair value of financial instruments for disclosure purposes and clarifies that an entity should evaluate the need for a valuation allowance on a deferred tax asset related to available-for-sale securities. This guidance also intends to enhance the presentation of certain fair value changes for financial liabilities measured at fair value. It also amends certain disclosure requirements associated with the fair value of financial instruments.

This guidance is effective for fiscal years beginning after December 15, 2017. The recognition and measurement provisions of this guidance was applied by means of a cumulative-effect adjustment to the balance sheet as of the beginning of the fiscal year of adoption and early adoption is not permitted. The adoption of this guidance did not have a material effect on the Company's result of operations, financial position or liquidity.

Leases

In February 2016, the FASB issued updated guidance regarding leases that generally requires the lessee and lessor to recognize lease assets and lease liabilities on the statement of financial position. A lessee should recognize on the statement of financial position a liability to make lease payments and an asset representing its right-to-use the underlying assets for the lease term. Optional payments to extend the lease or purchase the underlying leased asset should be included in the measurement of lease assets and lease liabilities only if the lessee is reasonably certain to exercise the option(s).

If the lease has a term of 12 months or less, a lessee can make an election to recognize lease expenses for such leases on a straight-line basis over the lease term. There is a differentiation between finance leases and operating leases for the lessee in the statements of operations and cash flows. Finance leases recognize interest on the lease liability separately from the right-to-use the asset whereas an operating lease recognizes a single lease cost allocated over the lease term on a generally straight-line basis. All cash payments are within operating activities in the statement of cash flows except finance leases classify repayments of the principal portion of the lease liability within financing activities.

The accounting applied by the lessor is largely unchanged from that applied under previous U.S. GAAP. Key aspects of the lessor accounting model, however, were aligned with the revenue recognition guidance of Codification Topic 606. The previous accounting model for leverage leases continues to apply only to those leveraged leases that commenced before the effective date of Codification Update 2016-02 Leases (Topic 842).

Entities will generally continue to account for leases that commenced before the effective date of this update in accordance with previous U.S. GAAP unless the lease is modified. Lessees are required to recognize a right-of-use asset and a lease liability for all operating leases at each reporting date based on the present value of the remaining minimal rental payments that were tracked and disclosed under previous U.S. GAAP. The updated guidance may be applied using a modified retrospective approach effective for annual and interim periods beginning after December 15, 2018. In July 2018, the FASB issued updated guidance (Accounting Standards Update 2018-11) that provides entities with an additional (and optional) transition method to adopt the new standard on leases. Under this new transition method, an entity initially applies the new standard on leases at the adoption date and recognizes a cumulative-effect adjustment to the opening balance of retained earnings in the period of adoption. Consequently, an entity's reporting for the comparative periods presented in the financial statements in which it adopts the new standard on leases will continue to be in accordance with current GAAP (Topic 840, Leases). An entity that elects this additional (and optional) transition method must provide the required Topic 840 disclosures for all periods that continue to be in accordance with Topic 840. Early adoption is permitted. The adoption of this guidance is not expected to have a material effect on the Company's results of operations, financial position or liquidity.

Financial Instruments — Credit Losses: Measurement of Credit Losses on Financial Instruments

In June 2016, the FASB issued updated guidance for the accounting for credit losses for financial instruments. The updated guidance applies a new credit loss model (current expected credit losses or CECL) for determining credit-related impairments for financial instruments measured at amortized cost (e.g. mortgage loans and reinsurance amounts recoverable) and requires an entity to estimate the credit losses expected over the life of an exposure or pool of exposures. The estimate of expected credit losses should consider historical information, current information, as well as reasonable and supportable forecasts, including estimates of prepayments. The expected credit losses, and subsequent adjustments to such losses, will be recorded through an allowance account that is deducted from the amortized cost basis of the financial asset, with the net carrying value of the financial asset presented on the consolidated balance sheet at the amount expected to be collected.

The updated guidance also amends the current other-than-temporary impairment model for available-for-sale debt securities by requiring the recognition of impairments relating to credit losses through an allowance account and limits the amount of credit loss to the difference between a security's amortized cost basis and its fair value. In addition, the length of time a security has been in an unrealized loss position will no longer impact the determination of whether a credit loss exists.

The updated guidance is effective for reporting periods beginning after December 15, 2019. Early adoption is permitted for reporting periods beginning after December 15, 2018. Based on the financial instruments currently held by the Company, the Company expects there would not be a material effect on the Company's results of operations, financial position or liquidity if the new guidance were able to be adopted in the current accounting period. The impact on the Company's results of operations, financial position or liquidity at the date of adoption of the updated guidance will be determined by the financial instruments held by the Company and the economic conditions at that time.

Statement of Cash Flows – Classification of Certain Cash Receipts and Cash Payments

In August 2016, the FASB issued specific guidance to reduce the existing diversity in practice in how eight specific cash flow issues of certain cash receipts and cash payments are presented and classified in the statement of cash flows. The updated guidance is effective for annual and interim periods beginning after December 15, 2017, and is to be applied retrospectively. Early adoption is permitted. The adoption of this guidance did not have a material effect on the Company's cash flows statement.

Statement of Cash Flows – Classification of Certain Cash Receipts and Cash Payments

In November 2016, the FASB issued specific guidance on the cash flow classification and presentation of changes in restricted cash or restricted cash equivalents when there are transfers between cash, cash equivalents and restricted cash or restricted cash equivalents and when there are direct cash receipts into restricted cash or restricted cash equivalents or direct cash payments made from restricted cash or restricted cash equivalents.

The updated guidance is effective for annual and interim periods beginning after December 15, 2017, and is to be applied retrospectively. Early adoption is permitted. The adoption of this guidance did not have a material effect on the Company's results of operations, financial position or liquidity.

Business Combinations – Clarifying the Definition of a Business

In January 2017, the FASB issued guidance to clarify the definition of a business to assist reporting entities in evaluating whether transactions should be accounted for as an acquisition or disposal of assets or businesses. This update provides a screen to determine when an integrated set of assets or activities is not a business and the requirements to be met to be considered a business.

The updated guidance is effective for annual and interim periods beginning after December 15, 2017, and is to be applied retrospectively. Early adoption is permitted in certain situations. The adoption of this guidance did not have a material effect on the Company's results of operations, financial position or liquidity.

Intangibles – Goodwill and Other - Simplifying the Test for Goodwill Impairment

In January 2017, the FASB issued guidance to modify the concept of impairment from the condition that exists when the carrying amount of goodwill exceeds its implied value to the condition that exists when the carrying amount of a reporting unit exceeds its fair value. Reporting entities will no longer determine goodwill impairment by calculating the implied fair value of goodwill by assigning the fair value of a reporting unit to all of its assets and liabilities as if that reporting unit had been acquired in a business combination. The updated guidance is effective for annual and interim periods beginning after December 15, 2019, and is to be applied prospectively. Early adoption is permitted for interim or annual goodwill impairment tests performed on testing dates after January 1, 2017. The adoption of this guidance is not expected to have a material effect on the Company's results of operations, financial position or liquidity.

Compensation — Retirement Benefits: Improving the Presentation of Net Periodic Pension Cost and Net Periodic Postretirement Benefit Cost

In March 2017, the FASB issued updated guidance to improve the presentation of net periodic pension cost and net periodic post retirement cost (net benefit costs). Net benefit costs comprise several components that reflect different aspects of an employer's financial arrangements as well as the cost of benefits provided to employees. The update requires that the employer service cost component be reported in the same lines as other employee compensation cost and that the other components (non-service costs) be presented separately from the service cost and outside of a subtotal of income from operations if one is presented. The update also allows only the service cost component to be eligible for capitalization in assets when applicable.

The updated guidance is effective for reporting periods beginning after December 15, 2017. The update is to be applied retrospectively with respect to the presentation of service cost and non-service cost and prospectively with respect to applying the service cost only eligible for capitalization in assets guidance. Early adoption is permitted as of the first interim period of an annual period if an entity issues interim financial statements. This pronouncement did not impact the Company since it does not have any pension or postretirement benefit plans and has no intention to adopt such plans.

Compensation — Stock Compensation: Scope of Modification Accounting

In May 2017, the FASB issued updated guidance related to a change to the terms or conditions (modification) of a share-based payment award. The updated guidance provides that an entity should account for the effects of a modification unless the fair value and vesting conditions of the modified award and the classification of the modified award (equity or liability instrument) are the same as the original award immediately before the modification.

The updated guidance is effective for the quarter ending March 31, 2018. The update is to be applied prospectively to an award modified on or after the adoption date. Early adoption is permitted in any interim periods for which financial statements have not yet been made available for issuance. The adoption of this guidance did not have a material effect on the Company's results of operations, financial position or liquidity.

Target Improvement to Accounting for Hedging Activities

In August 2017, the FASB issued updated authoritative guidance for the application of hedge accounting. The updated guidance updates certain recognition and measurement requirements for hedge accounting. The objective of the guidance is to more closely align the economics of a company's risk management activities in its financial results and reduce the complexity of applying hedge accounting. The updates include the expansion of hedging strategies that are eligible for hedge accounting, elimination of the separate measurement and reporting of hedge ineffectiveness, presentation of the changes in the fair value of the hedging instrument in the same consolidated statement of operations line as the earnings effect of the hedged item and simplification of hedge effectiveness assessments. This guidance also includes new disclosures and will be applied using a modified retrospective approach by recording a cumulative-effect adjustment to retained earnings as of the beginning of the fiscal year of adoption.

The updated guidance is effective for reporting periods beginning after December 15, 2018. Early adoption is permitted for reporting periods beginning before December 15, 2018. The Company does not currently and does not intend to participate in hedging activities and there is therefore no impact on the Company's results of operations, financial position or liquidity. This pronouncement would be adopted if the Company begins to participate in hedging activities in the future.

Reclassification of Certain Tax Effects from Accumulated Other Comprehensive Income

On February 14, 2018, the FASB issued updated guidance that allows a reclassification of the stranded tax effects in accumulated other comprehensive income resulting from the Tax Cuts and Jobs Act of 2017. Current guidance requires the effect of a change in tax laws or rates on deferred tax balances to be reported in income from continuing operations in the accounting period that includes the period of enactment, even if the related income tax effects were originally charged or credited directly to accumulated other comprehensive income. The amount of the reclassification would include the effect of the change in the U.S. federal corporate income tax rate on the gross deferred tax amounts and related valuation allowances, if any, at the date of the enactment of the Tax Cuts and Jobs Act of 2017 related to items in accumulated other comprehensive income. The updated guidance is effective for reporting periods beginning after December 15, 2018 and is to be applied retrospectively to each period in which the effect of the Tax Cuts and Jobs Act of 2017 related to items remaining in accumulated other comprehensive income are recognized or at the beginning of the period of adoption. Early adoption is permitted.

The Company adopted the updated guidance effective December 31, 2017. The adoption of this guidance did not have a material effect on the Company's result of operations, financial position or liquidity.

Business Segments

FASB guidance requires a "management approach" in the presentation of business segments based on how management internally evaluates the operating performance of business units. The discussion of segment operating results that follows is being provided based on segment data prepared in accordance with this methodology.

Our business segments are as follows:

- Life insurance operations, consisting of the life insurance operations of TLIC and FBLIC;
- Annuity operations, consisting of the annuity operations of TLIC and FBLIC and
- Corporate operations, which includes the results of the parent company and FTCC after the elimination of intercompany amounts.

Please see below and Note 4 to the Consolidated Financial Statements for the three and six months ended June 30, 2018 and 2017 and as of June 30, 2018 and December 31, 2017 for additional information regarding segment information.

The following is a discussion and analysis of our financial condition, results of operations and liquidity and capital resources.

Results of Operations – Three Months Ended June 30, 2018 and 2017

Revenues

Our primary sources of revenue are life insurance premium income and investment income. Premium payments are classified as first-year, renewal and single. In addition, realized gains and losses on investment holdings can significantly impact revenues from period to period.

Our revenues for the three months ended June 30, 2018 and 2017 are summarized as follows:

	(Unaudited)		Amount Change
	Three Months Ended June 30,		2018 less 2017
	2018	2017	
Premiums	\$ 4,572,872	\$ 3,880,345	\$ 692,527

Total revenues	<u>\$ 9,918,775</u>	<u>\$ 7,759,482</u>	<u>\$ 2,159,293</u>

The \$2,159,293 increase in total revenues for the three months ended June 30, 2018 is discussed below.

Premiums

Our premiums for the three months ended June 30, 2018 and 2017 are summarized as follows:

	(Unaudited)		
	Three Months Ended June 30,		Amount Change
	2018	2017	2018 less 2017
Whole life and term first year	\$ 57,886	\$ 42,262	\$ 15,624
Whole life and term renewal	520,419	564,525	(44,106)
Final expense first year	1,119,185	1,205,408	(86,223)
Final expense renewal	2,875,382	2,068,150	807,232
Total premiums	<u>\$ 4,572,872</u>	<u>\$ 3,880,345</u>	<u>\$ 692,527</u>

The \$692,527 increase in premiums for the three months ended June 30, 2018 is primarily due to an \$807,232 increase in final expense renewal premiums that exceeded an \$86,223 decrease in final expense first year premiums and a \$44,106 decrease in whole life and term renewal premiums.

The increase in final expense renewal premiums reflects the persistency of prior years' final expense production. The decrease in final expense first year premium reflects the increased competition by our competitors. Our marketing efforts are focused on final expense and annuity production.

Net Investment Income

The major components of our net investment income for the three months ended June 30, 2018 and 2017 are summarized as follows:

	(Unaudited)		
	Three Months Ended June 30,		Amount Change
	2018	2017	2018 less 2017
Fixed maturity securities	\$ 1,669,950	\$ 1,665,525	\$ 4,425

Other long-term investments	1,009,007	882,009	126,998
Mortgage loans	2,887,505	2,002,184	885,321
Policy loans	30,342	28,453	1,889
Real Estate	94,003	93,712	291
Short-term and other investments	25,939	(12,749)	38,688
Gross investment income	<u>5,744,780</u>	<u>4,664,220</u>	<u>1,080,560</u>
Investment expenses	<u>(706,639)</u>	<u>(669,156)</u>	<u>37,483</u>
Net investment income	<u>\$ 5,038,141</u>	<u>\$ 3,995,064</u>	<u>\$ 1,043,077</u>

The \$1,080,560 increase in gross investment income for the three months ended June 30, 2018 is primarily due to the increase in investments in mortgage loans and other long-term investments. In the twelve months since June 30, 2017, we had increased investments in mortgage loans of \$19.7 million and other long term investments of \$1.0 million.

Net Realized Investment Gains

Our net realized investment gains result from sales of fixed maturity securities available-for-sale, equity securities at fair value, sale of investment real estate, sale of other long-term investments and changes in fair value of equity securities.

Our net realized investment gains for the three months ended June 30, 2018 and 2017 are summarized as follows:

The Company has recorded other-than-temporary impairments on its fixed maturity available-for-sale investment in an energy corporation with a total par value of \$650,000 as a result of continuing unrealized losses. During fourth quarter 2016 this security was initially impaired by a \$207,450 charge to the statement of operations. During second quarter 2017 this security was further impaired by a \$224,250 charge to the statement of operations. These impairments were considered fully credit-related and represent the difference between the amortized cost basis of the security and its fair value. The Company experienced no additional other-than-temporary impairments on fixed maturity available-for-sale securities for the six months ended June 30, 2018 and the year ended December 31, 2017.

Total Benefits, Claims and Expenses

Our benefits, claims and expenses are primarily generated from benefit payments, surrenders, interest credited to policyholders, change in reserves, commissions and other underwriting, insurance and acquisition expenses. Benefit payments can significantly impact expenses from period to period.

Our benefits, claims and expenses for the three months ended June 30, 2018 and 2017 are summarized as follows:

	(Unaudited)		Amount Change 2018 less 2017
	Three Months Ended June 30,

Total expenses	<u>2,488,699</u>	<u>2,185,567</u>	<u>303,132</u>
Total benefits, claims and expenses	<u>\$ 8,144,173</u>	<u>\$ 7,070,408</u>	<u>\$ 1,073,765</u>

The \$1,073,765 increase in total benefits, claims and expenses for the three months ended June 30, 2018 is discussed below.

Benefits and Claims

The \$770,633 increase in benefits and claims for the three months ended June 30, 2018 is primarily due to the following:

- \$637,385 increase in death benefits is primarily due to approximately \$640,000 of increased final expense settlements, \$44,000 of decreased ceded in course of settlement, \$43,000 of increased ordinary life settlements that exceeded \$71,000 of increased ceded claims.
- \$102,172 increase in interest credited to policyholders is primarily due to an increase of approximately \$9.3 million in the amount of policyholders' account balances in the consolidated statement of financial position (increased deposits and interest credited in excess of withdrawals) since June 30, 2017.

Deferral and Amortization of Deferred Acquisition Costs

Certain costs related to the successful acquisition of traditional life insurance policies are capitalized and amortized over the premium-paying period of the policies. Certain costs related to the successful acquisition of insurance and annuity policies that subject us to mortality or morbidity risk over a period that extends beyond the period or periods in which premiums are collected and that have terms that are fixed and guaranteed (i.e., limited-payment long-duration annuity contracts) are capitalized and amortized in relation to the present value of actual and expected gross profits on the policies.

These acquisition costs, which are referred to as deferred policy acquisition costs, include commissions and other successful costs of acquiring policies and contracts, which vary with, and are primarily related to, the successful production of new and renewal life insurance policies and annuity contracts.

For the three months ended June 30, 2018 and 2017, capitalized costs were \$2,180,425 and \$2,586,318, respectively. Amortization of deferred policy acquisition costs for the three months ended June 30, 2018 and 2017 were \$1,172,075 and \$747,306, respectively.

The \$405,893 decrease in the 2018 acquisition costs deferred primarily relates to decreased annuity production resulting in decreased annuity commissions available for deferral. The \$424,769 increase in the 2018 amortization of deferred acquisition costs is primarily due to increased death benefits.

Amortization of Value of Insurance Business Acquired

The cost of acquiring insurance business is amortized over the emerging profit of the related policies using the same assumptions that were used in computing liabilities for future policy benefits. Amortization of the value of insurance business acquired was \$81,878 and \$107,296 for the three months ended June 30, 2018 and 2017, respectively.

Commissions

Our commissions for the three months ended June 30, 2018 and 2017 are summarized as follows:

	(Unaudited)		
	Three Months Ended June 30,		Amount Change
	2018	2017	2018 less 2017
Annuity	\$ 235,850	\$ 652,895	\$ (417,045)
Whole life and term first year	52,560	36,963	15,597
Whole life and term renewal	14,937	17,886	(2,949)
Final expense first year	1,340,040	1,440,721	(100,681)
Final expense renewal	283,149	196,598	86,551
Total commissions	<u>\$ 1,926,536</u>	<u>\$ 2,345,063</u>	<u>\$ (418,527)</u>

The \$418,527 decrease in commissions for the three months ended June 30, 2018 is primarily due to a \$417,045 decrease in annuity commissions (due to a \$17,841,720 decrease in annuity considerations) and a \$100,681 decrease in final expense first year commissions (due to a \$86,223 decrease in first year final expense premiums) that exceeded an \$86,551 increase in final expense renewal commissions (due to a \$807,232 increase in final expense renewal premiums).

Federal Income Taxes

FTFC files a consolidated federal income tax return with FTCC but does not file a consolidated tax return with TLIC or FBLIC. TLIC and FBLIC are taxed as life insurance companies under the provisions of the Internal Revenue Code. Life insurance companies must file separate tax returns until they have been a member of the consolidated filing group for five years. We continue to file consolidated life insurance company federal tax returns for TLIC and FBLIC. Certain items included in income reported for financial statement purposes are not included in taxable income for the current period, resulting in deferred income taxes.

For the three months ended June 30, 2017, current income tax expense \$19,909. For the three months ended June 30, 2018 and 2017, deferred federal income tax expense was \$375,225 and \$119,121, respectively. The \$256,104 increase in deferred income taxes is primarily due to the \$925,000 lawsuit settlement payment during second quarter of 2018 and the corresponding \$194,250 increase in deferred tax expense.

Net Income Per Common Share Basic and Diluted

Net income was \$1,399,377 (\$0.18 per common share basic and diluted) and \$550,044 (\$0.07 per common share basic and diluted) for the three months ended June 30, 2018 and 2017, respectively. Net income per common share basic and diluted is calculated using the weighted average number of common shares outstanding during the period. The weighted average outstanding and subscribed common shares basic and diluted for the three months ended June 30, 2018 and 2017 were 7,802,593.

Business Segments

The Company has a life insurance segment, consisting of the life insurance operations of TLIC and FBLIC, an annuity segment, consisting of the annuity operations of TLIC and FBLIC and a corporate segment. Results for the parent company and the operations of FTCC, after elimination of intercompany amounts, are allocated to the corporate segment.

The revenues and income before federal income taxes from our business segments for the three months ended June 30, 2018 and 2017 are summarized as follows:

- \$587,243 decrease in policy acquisition costs deferred net of amortization

Corporate Operations

The \$71,850 increase in revenues from Corporate Operations for the three months ended June 30, 2018 is due to \$63,969 of increased net investment income and \$7,881 of increased service fees and other income.

The \$47,610 increase in Corporate Operations profitability for the three months ended June 30, 2018 is primarily due to \$63,969 of increased net investment income and \$7,881 of increased service fees and other income that exceeded \$24,240 of increased operating expenses.

Results of Operations – Six Months Ended June 30, 2018 and 2017

Revenues

Our primary sources of revenue are life insurance premium income and investment income. Premium payments are classified as first-year, renewal and single. In addition, realized gains and losses on investment holdings can significantly impact revenues from period to period.

Our revenues for the six months ended June 30, 2018 and 2017 are summarized as follows:

	(Unaudited)		Amount Change 2018 less 2017
	Six Months Ended June 30,		
	2018	2017	
Premiums	\$ 9,059,607	\$ 7,502,035	\$ 1,557,572
Net investment income	9,722,383	7,664,935	2,057,448
Net realized investment gains	24,472	257,594	(233,122)

Total revenues	<u>\$ 19,086,195</u>	<u>\$ 15,267,441</u>	<u>\$ 3,818,754</u>

The \$3,818,754 increase in total revenues for the six months ended June 30, 2018 is discussed below.

Premiums

Our premiums for the six months ended June 30, 2018 and 2017 are summarized as follows:

	(Unaudited)		Amount Change 2018 less 2017
	Six Months Ended June 30,		
	2018	2017	
Whole life and term first year	\$ 108,740	\$ 81,887	\$ 26,853
Whole life and term renewal	1,094,783	1,160,967	(66,184)
Final expense first year	2,267,213	2,281,387	(14,174)
Final expense renewal	5,502,661	3,971,224	1,531,437
Supplementary contracts with life contingencies	86,210	6,570	79,640
Total premiums	<u>\$ 9,059,607</u>	<u>\$ 7,502,035</u>	<u>\$ 1,557,572</u>

The \$1,557,572 increase in premiums for the six months ended June 30, 2018 is primarily due to the a \$1,531,437 increase in final expense renewal premiums and \$79,640 increase in considerations for supplementary contracts with life contingencies that exceeded the \$66,184 decrease in whole life and term renewal premiums.

The increase in final expense renewal premiums reflects the persistency of prior years' final expense production. Our marketing efforts are focused on final expense and annuity production and we have not been focused on whole life and term production the past few years. The increase in supplementary contracts with life contingencies reflects policyholder decisions to receive future payment streams during their remaining life instead of a lump sum payment.

Net Investment Income

The major components of our net investment income for the six months ended June 30, 2018 and 2017 are summarized as follows:

	(Unaudited)		Amount Change 2018 less 2017
	Six Months Ended June 30,		
	2018	2017	
Fixed maturity securities	\$ 3,300,424	\$ 3,155,895	\$ 144,529
Preferred stock and equity securities	33,117	10,158	22,959
Other long-term investments	1,979,063	1,739,479	239,584
Mortgage loans	5,375,918	3,669,578	1,706,340

Net investment income	<u>\$ 9,722,383</u>	<u>\$ 7,664,935</u>	<u>\$ 2,057,448</u>

The \$2,087,547 increase in gross investment income for the six months ended June 30, 2018 is primarily due to increases in investments in mortgage loans and other long-term investments. In the twelve months since June 30, 2017, our investments in mortgage loans have increased approximately \$19.7 million and other long term investments have increased approximately \$1.0 million. The increase in gross investment income from fixed maturity securities is primarily due to securities that have been called or matured and replaced with securities with higher yields.

Net Realized Investment Gains

Our net realized investment gains result from sales of fixed maturity securities available-for-sale, equity securities at fair value, sale of investment real estate, sale of other long-term investments and changes in fair value of equity securities.

Our net realized investment gains for the six months ended June 30, 2018 and 2017 are summarized as follows:

The Company has recorded other-than-temporary impairments on its fixed maturity available-for-sale investment in an energy corporation with a total par value of \$650,000 as a result of continuing unrealized losses. During fourth quarter 2016 this security was initially impaired by a \$207,450 charge to the statement of operations. During second quarter 2017 this security was further impaired by a \$224,250 charge to the statement of operations. These impairments were considered fully credit-related and represent the difference between the amortized cost basis of the security and its fair value. The Company experienced no additional other-than-temporary impairments on fixed maturity available-for-sale securities for the six months ended June 30, 2018 and the year ended December 31, 2017.

Total Benefits, Claims and Expenses

Our benefits, claims and expenses are primarily generated from benefit payments, surrenders, interest credited to policyholders, change in reserves, commissions and other underwriting, insurance and acquisition expenses. Benefit payments can significantly impact expenses from period to period.

Our benefits, claims and expenses for the six months ended June 30, 2018 and 2017 are summarized as follows:

	(Unaudited)		Amount Change 2018 less 2017
	Six Months Ended June 30,

Other underwriting, insurance and acquisition expenses	3,132,028	3,226,423	(94,395)
Total expenses	4,840,340	4,452,965	387,375
Total benefits, claims and expenses	\$ 16,100,146	\$ 14,228,850	\$ 1,871,296

The \$1,871,296 increase in total benefits, claims and expenses for the six months ended June 30, 2018 is discussed below.

Benefits and Claims

The \$1,483,921 increase in benefits and claims for the six months ended June 30, 2018 is primarily due to the following:

- \$653,605 increase in death benefits is primarily due to approximately \$916,000 of increased final expense settlements that exceeded \$186,000 of decreased ordinary life settlements and \$105,000 of increased ceded claims.
- \$523,687 increase in future policy benefits is primarily due to the increased number of life policies in force and the aging of existing life policies.
- \$374,449 increase in interest credited to policyholders is primarily due to an increase of approximately \$9.3 million in the amount of policyholders' account balances in the consolidated statement of financial position (increased deposits and interest credited in excess of withdrawals) since June 30, 2017.

Deferral and Amortization of Deferred Acquisition Costs

Certain costs related to the successful acquisition of traditional life insurance policies are capitalized and amortized over the premium-paying period of the policies. Certain costs related to the successful acquisition of insurance and annuity policies that subject us to mortality or morbidity risk over a period that extends beyond the period or periods in which premiums are collected and that have terms that are fixed and guaranteed (i.e., limited-payment long-duration annuity contracts) are capitalized and amortized in relation to the present value of actual and expected gross profits on the policies.

These acquisition costs, which are referred to as deferred policy acquisition costs, include commissions and other successful costs of acquiring policies and contracts, which vary with, and are primarily related to, the successful production of new and renewal insurance and annuity contracts.

For the six months ended June 30, 2018 and 2017, capitalized costs were \$4,488,458 and \$5,001,037, respectively. Amortization of deferred policy acquisition costs for the six months ended June 30, 2018 and 2017 were \$1,995,623 and \$1,428,142, respectively.

The \$512,579 decrease in the 2018 acquisition costs deferred primarily relates to decreased annuity production resulting in decreased annuity commissions available for deferral. The \$567,481 increase in the 2018 amortization of deferred acquisition costs is primarily due to increased death benefits.

Amortization of Value of Insurance Business Acquired

The cost of acquiring insurance business is amortized over the emerging profit of the related policies using the same assumptions that were used in computing liabilities for future policy benefits. Amortization of the value of insurance business acquired was \$171,489 and \$209,464 for the six months ended June 30, 2018 and 2017, respectively.

Commissions

Our commissions for the six months ended June 30, 2018 and 2017 are summarized as follows:

	(Unaudited)		Amount Change 2018 less 2017
	Six Months Ended June 30,		
	2018	2017	
Annuity	\$ 642,779	\$ 1,371,805	\$ (729,026)
Whole life and term first year	100,219	72,789	27,430
Whole life and term renewal	32,637	41,872	(9,235)
Final expense first year	2,714,480	2,728,416	(13,936)
Final expense renewal	539,543	375,091	164,452
Total commissions	<u>\$ 4,029,658</u>	<u>\$ 4,589,973</u>	<u>\$ (560,315)</u>

The \$560,315 decrease in commissions for the six months ended June 30, 2018 is primarily due to a \$729,026 decrease in annuity commissions (due to a \$35,460,331 decline in annuity considerations) that exceeded a \$164,452 increase in final expense renewal commissions (due to a \$1,531,437 increase in final expense renewal premiums).

Federal Income Taxes

FTFC files a consolidated federal income tax return with FTCC but does not file a consolidated tax return with TLIC or FBLIC. TLIC and FBLIC are taxed as life insurance companies under the provisions of the Internal Revenue Code. Life insurance companies must file separate tax returns until they have been a member of the consolidated filing group for five years. We continue to file consolidated life insurance company federal tax returns for TLIC and FBLIC. Certain items included in income reported for financial statement purposes are not included in taxable income for the current period, resulting in deferred income taxes.

For the six months ended June 30, 2017, current income tax expense was \$19,909. Deferred federal income tax expense was \$646,291 and \$207,160 for the six months ended June 30, 2018 and 2017, respectively. The \$439,131 increase in deferred income taxes is primarily due to the \$1,850,000 lawsuit settlement payment during 2018 and the corresponding \$388,500 increase in deferred tax expense.

Net Income Per Common Share Basic and Diluted

Net income was \$2,339,758 (\$0.30 per common share basic and diluted) and \$811,522 (\$0.10 per common share basic and diluted) for the six months ended June 30, 2018 and 2017, respectively.

Net income per common share basic and diluted is calculated using the weighted average number of common shares outstanding and subscribed during the period. The weighted average outstanding and subscribed common shares basic and diluted for both the six months ended June 30, 2018 and 2017 were 7,802,593.

Business Segments

The Company has a life insurance segment, consisting of the life insurance operations of TLIC and FBLIC, an annuity segment, consisting of the annuity operations of TLIC and FBLIC and a corporate segment. Results for the parent company and the operations of FTCC, after elimination of intercompany amounts, are allocated to the corporate segment.

The revenues and income before federal income taxes from our business segments for the six months ended June 30, 2018 and 2017 are summarized as follows:

Fixed maturity securities, available-for-sale, ending	<u>\$ 144,729,230</u>	<u>\$ 151,551,123</u>

Fixed maturity securities available-for-sale are reported at fair value with unrealized gains and losses, net of applicable income taxes, reflected as a separate component in shareholders' equity within "Accumulated Other Comprehensive Income." The available-for-sale fixed maturity securities portfolio is invested primarily in a variety of companies, U. S. government and government agencies, states and political subdivisions and foreign securities.

The \$1,700 decrease and \$5,578 increase in preferred stock available-for-sale for the six months ended June 30, 2018 and 2017, respectively, are summarized as follows:

	(Unaudited)	
	Six Months Ended June 30,

Total other assets	<u>\$ 11,532,357</u>	<u>\$ 10,920,570</u>	<u>\$ 611,787</u>

There was a \$1,009,725 increase in federal and state income taxes recoverable primarily due to federal and state tax withholdings on lottery receivables.

As of June 30, 2018, the Company had \$1,039,027 of security sales where the trade date and settlement date were in different financial reporting periods compared to \$364,611 of security sales overlapping financial reporting periods as of December 31, 2017.

There was a \$978,133 decrease in the accrual of mortgage loans and long-term investment payments due based upon the scheduled timing of investment payments remitted by the third party servicers. Those cash payments were received in July 2018.

On April 15, 2018, the Company renewed its previous one-year loan of \$400,000 to its former Chairman. The renewed loan also has a term of one year and a contractual interest rate of 5.00%. The loan is collateralized by 100,000 shares of the Company's Class A Common stock owned by the former Chairman.

Our liabilities as of June 30, 2018 and December 31, 2017 are summarized as follows:

The \$2,938,075 increase in future policy benefits during the six months ended June 30, 2018 is primarily related to the production of new life insurance policies, initial sales of policies to older age bands (resulting in increased mortality reserve charges) and the aging of existing policies.

The \$782,504 decrease in deferred federal income taxes during the six months ended June 30, 2018 was due to \$1,428,795 of decreased deferred federal income taxes on the unrealized appreciation (depreciation) of fixed maturity and preferred stock available-for-sale and \$646,291 of operating deferred federal tax expense.

Our other liabilities as of June 30, 2018 and December 31, 2017 are summarized as follows:

	(Unaudited)		Amount Change
	June 30, 2018	December 31, 2017	2018 less 2017
Suspense accounts payable	\$ 2,312,575	\$ 42,901	\$ 2,269,674

Total other liabilities	<u>\$ 3,156,673</u>	<u>\$ 3,123,702</u>	<u>\$ 32,971</u>

The \$2,269,674 increase in suspense accounts payable is due to increased deposits on policy applications that had not been issued as of the financial reporting date.

The \$1,862,346 decrease in accounts payable is primarily due to a payment of \$1,850,000 to settle the FBLIC Term to 95 lawsuit.

The \$254,000 decrease in accrued expenses payable is primarily due to payments of accrued legal fees.

As of June 30, 2018, the Company had \$562,209 of security purchases where the trade date and settlement date were in different financial reporting periods compared to \$462,598 of security purchases overlapping financial reporting periods as of December 31, 2017.

The \$214,270 decline in other payables, withholdings and escrows is primarily due to an increase in escrows on commercial mortgage loans.

Liquidity and Capital Resources

Our operations have been financed primarily through the private placement of equity securities and intrastate public stock offerings. Through June 30, 2018, we have received \$27,119,480 from the sale of our shares.

The Company raised \$1,450,000 from two private placements during 2004 and \$25,669,480 from two public stock offerings and one private placement stock offering from June 22, 2005 through February 23, 2007; June 29, 2010 through April 30, 2012; and August 15, 2012 through March 8, 2013. The Company issued 7,347,488 shares of its common stock and incurred \$3,624,518 of offering costs during these private placements and public stock offerings.

The Company also issued 702,685 shares of its common stock in connection with two stock dividends paid to shareholders in 2011 and 2012 that resulted in accumulated earnings being charged \$5,270,138 with an offsetting credit of \$5,270,138 to common stock and additional paid-in capital.

The Company has also purchased 247,580 shares of treasury stock at a cost of \$893,947 from former members of the Board of Directors including the former Chairman of the Board of Directors, a former agent, the former spouse of the Company's Chairman, Chief Executive Officer and President and a charitable organization where a former member of the Board of Directors had donated shares of the Company's common stock.

As of June 30, 2018, we had cash and cash equivalents totaling \$16,585,991. As of June 30, 2017, cash and cash equivalents of \$8,769,469 and \$5,546,821, respectively, of the total \$16,585,991 were held by TLIC and FBLIC and may not be available for use by FTFC due to the required pre-approval by the OID and Missouri Department of Insurance of any dividend or intercompany transaction to transfer funds to FTFC. The maximum dividend, which may be paid in any twelve-month period without notification or approval, is limited to the greater of 10% of statutory surplus as of December 31 of the preceding year or the net gain from operations of the preceding calendar year.

Cash dividends may only be paid out of surplus derived from realized net profits. Based on these limitations, there is capacity for TLIC to pay a dividend up to \$1,124,823 in 2018 without prior approval. In addition, based on those limitations, there is the capacity for FBLIC to pay a dividend up to \$760,348 in 2018 without prior approval. FBLIC paid no dividends to TLIC in 2018 and 2017. TLIC has paid no dividends to FTFC in 2018 and 2017.

The Company maintains cash and cash equivalents at multiple institutions. The Federal Deposit Insurance Corporation insures interest and non-interest bearing accounts up to \$250,000. Uninsured balances aggregate \$11,604,852 and \$21,835,216 as of June 30, 2018 and December 31, 2017, respectively. Other funds are invested in mutual funds that invest in U.S. government securities. We monitor the solvency of all financial institutions in which we have funds to minimize the exposure for loss. The Company has not experienced any losses in such accounts.

Through June 30, 2018, the Company had a \$1.0 million line of credit with a bank to provide working capital and funds for expansion. The terms of the line of credit allowed for advances, repayments and re-borrowings through the maturity date of July 1, 2018. Any outstanding advances would have incurred interest at a variable interest rate of the prime rate set forth in the Wall Street Journal plus 1% per annum adjusting monthly based on a 360 day year. The Company did not utilize this line of credit during 2018 or 2017.

Please see the statements of cash flows for the six months ended June 30, 2018 and 2017 for a summary of the components of net cash used in investing activities and net cash provided by financing activities.

Our shareholders' equity as of June 30, 2018 and December 31, 2017 is summarized as follows:

	(Unaudited)		Amount Change 2018 less 2017
	June 30, 2018	December 31, 2017	
Common stock, par value \$.01 per share (20,000,000 shares authorized, 8,050,173 issued as of June 30, 2018 and December 31, 2017 and 7,802,593 outstanding as of June 30, 2018 and December 31, 2017)	\$ 80,502	\$ 80,502	\$ -

Total shareholders' equity	<u>\$ 38,285,449</u>	<u>\$ 41,252,179</u>	<u>\$ (2,966,730)</u>

The decrease in shareholders' equity of \$2,966,730 for the six months ended June 30, 2018 is due to \$5,374,996 in other comprehensive loss that exceeded \$2,339,758 in net income and a \$68,508 cumulative-effect of adoption of accounting guidance for reporting changes in fair value of equity securities in net realized gains and losses instead of accumulated other comprehensive income.

Equity per common share outstanding decreased 7.2% from \$5.29 per share as of December 31, 2017 to \$4.91 per share as of June 30, 2018, based upon 7,802,593 common shares outstanding as of both June 30, 2018 and December 31, 2017.

The liquidity requirements of our life insurance companies are met primarily by funds provided from operations. Premium and annuity consideration deposits, investment income and investment maturities are the primary sources of funds, while investment purchases, policy benefits, and operating expenses are the primary uses of funds. There were no liquidity issues in 2018 or 2017. Our investments include marketable debt securities that could be readily converted to cash for liquidity needs.

We are subject to various market risks. The quality of our investment portfolio and the current level of shareholders' equity continue to provide a sound financial base as we strive to expand our marketing to offer competitive products. Our investment portfolio had unrealized appreciation (depreciation) on available-for-sale securities of (\$791,322) and \$6,130,475 as of June 30, 2018 and December 31, 2017, respectively, prior to the impact of income taxes and deferred acquisition cost adjustments. A decrease of \$6,813,812 in unrealized losses arising for the six months ended June 30, 2018 has been offset by the cumulative effect adjustment for the adoption of accounting guidance for equity securities of \$68,508 and 2018 net realized investment gains of \$39,477 originating from the sale and call activity for fixed maturity securities available-for-sale resulting in net unrealized losses on investments of \$6,921,797.

A primary liquidity concern is the risk of an extraordinary level of early policyholder withdrawals. We include provisions within our insurance policies, such as surrender charges, that help limit and discourage early withdrawals. Individual life insurance policies are less susceptible to withdrawal than annuity reserves and deposit liabilities because policyholders may incur surrender charges and undergo a new underwriting process in order to obtain a new insurance policy. Cash flow projections and cash flow tests under various market interest rate scenarios are also performed annually to assist in evaluating liquidity needs and adequacy. We currently anticipate that available liquidity sources and future cash flows will be adequate to meet our needs for funds.

One of our significant risks relates to the fluctuations in interest rates. Regarding interest rates, the value of our available-for-sale fixed maturity securities investment portfolio will increase or decrease in an inverse relationship with fluctuations in interest rates, while net investment income earned on newly acquired available-for-sale fixed maturity securities increases or decreases in direct relationship with interest rate changes.

From an income perspective, we are exposed to rising interest rates which could be a significant risk, as TLIC's and FBLIC's annuity business is impacted by changes in interest rates. Life insurance company policy liabilities bear fixed rates. From a liquidity perspective, our fixed rate policy liabilities are relatively insensitive to interest rate fluctuations.

We believe gradual increases in interest rates do not present a significant liquidity exposure for the life insurance policies and annuity contracts. We maintain conservative durations in our fixed maturity portfolio.

As of June 30, 2018, cash and cash equivalents, short-term investments, the fair value of fixed maturity available-for-sale securities with maturities of less than one year and the fair value of lottery receivables with maturities of less than one year equaled 9.1% of total policy liabilities. If interest rates rise significantly in a short time frame, there can be no assurance that the life insurance industry, including the Company, would not experience increased levels of surrenders and reduced sales, and thereby be materially adversely affected.

In addition to the measures described above, TLIC and FBLIC must comply with the National Association of Insurance Commissioners promulgated Standard Valuation Law ("SVL") which specifies minimum reserve levels and prescribes methods for determining them, with the intent of enhancing solvency. Upon meeting certain tests, which TLIC and FBLIC met during 2017, the SVL also requires the Company to perform annual cash flow testing for TLIC and FBLIC. This testing is designed to ensure that statutory reserve levels will maintain adequate protection in a variety of potential interest rate scenarios. The Actuarial Standards Board of the American Academy of Actuaries also requires cash flow testing as a basis for the actuarial opinion on the adequacy of the reserves which is a required part of the annual statutory reporting process.

Our marketing plan could be modified to emphasize certain product types and reduce others. New business levels could be varied in order to find the optimum level. We believe that our current liquidity, current bond portfolio maturity distribution and cash position give us substantial resources to administer our existing business and fund growth generated by direct sales.

The operations of TLIC and FBLIC may require additional capital contributions to meet statutory capital and surplus requirements mandated by state insurance departments. Life insurance contract liabilities are generally long term in nature and are generally paid from future cash flows or existing assets and reserves. We will service other expenses and commitments by: (1) using available cash, (2) dividends from TLIC and FBLIC that are limited by law to the greater of prior year net operating income or 10% of prior year-end surplus unless specifically approved by the controlling insurance department, (3) public and private offerings of our common stock and (4) corporate borrowings, if necessary.

Effective January 1, 2017, the Company entered into a revised advance agreement with one loan originator. As of June 30, 2018, the Company has outstanding advances to this loan originator totaling \$4,863,235. The advances are secured by \$6,801,940 of residential mortgage loans on real estate that are assigned to the Company. The Company has committed to fund up to an additional \$636,765 to the loan originator that would result in additional security in the form of residential mortgage loans on real estate to be assigned to the Company.

Effective January 1, 2017, the Company also entered into a revised escrow agreement with the same loan originator. According to the revised terms of the escrow agreement, as of June 30, 2018, \$599,645 of additional and secured residential mortgage loan balances on real estate are held in escrow by the Company. As of June 30, 2018, \$409,546 of that escrow amount is available to the Company as additional collateral on \$4,863,235 of advances to the loan originator. The remaining June 30, 2018 escrow amount of \$190,099 is available to the Company as additional collateral on its investment of \$38,019,842 in residential mortgage loans on real estate.

We are not aware of any commitments or unusual events that could materially affect our capital resources. We are not aware of any current recommendations by any regulatory authority which, if implemented, would have a material adverse effect on our liquidity, capital resources or operations. We believe that our existing cash and cash equivalents as of June 30, 2018 will be sufficient to fund our anticipated operating expenses.

Off-Balance Sheet Arrangements

The Company does not have any off-balance sheet arrangements.

SPECIAL NOTE CONCERNING FORWARD-LOOKING STATEMENTS

Certain statements contained herein are forward-looking statements. The forward-looking statements are made pursuant to the “safe harbor” provisions of the Private Securities Litigation Reform Act of 1995, and include estimates and assumptions related to economic, competitive and legislative developments. Forward-looking statements may be identified by words such as “expects,” “intends,” “anticipates,” “plans,” “believes,” “estimates,” “will” or words of similar meaning; and include, but are not limited to, statements regarding the outlook of our business and financial performance. These forward-looking statements are subject to change and uncertainty, which are, in many instances, beyond our control and have been made based upon our expectations and beliefs concerning future developments and their potential effect upon us.

There can be no assurance that future developments will be in accordance with our expectations, or that the effect of future developments on us will be as anticipated. These forward-looking statements are not a guarantee of future performance and involve risks and uncertainties. There are certain important factors that could cause actual results to differ, possibly materially, from expectations or estimates reflected in such forward-looking statements. These factors include among others:

- general economic conditions and financial factors, including the performance and fluctuations of fixed income, equity, real estate, credit capital and other financial markets;
- differences between actual experience regarding mortality, morbidity, persistency, surrenders, investment returns, and our pricing assumptions establishing liabilities and reserves or for other purposes;
- the effect of increased claims activity from natural or man-made catastrophes, pandemic disease, or other events resulting in catastrophic loss of life;
- adverse determinations in litigation or regulatory matters and our exposure to contingent liabilities, including and in connection with our divestiture or winding down of businesses such as FTCC;
- inherent uncertainties in the determination of investment allowances and impairments and in the determination of the valuation allowance on the deferred income tax asset;
- investment losses and defaults;
- competition in our product lines;
- attraction and retention of qualified employees and agents;
- ineffectiveness of risk management policies and procedures in identifying, monitoring and managing risks;
- the availability, affordability and adequacy of reinsurance protection;
- the effects of emerging claim and coverage issues;
- the cyclical nature of the insurance business;
- interest rate fluctuations;

- changes in our experiences related to deferred policy acquisition costs;
- the ability and willingness of counterparties to our reinsurance arrangements and derivative instruments to pay balances due to us;
- impact of medical epidemics and viruses;
- domestic or international military actions;
- the effects of extensive government regulation of the insurance industry;
- changes in tax and securities law;
- changes in statutory or U.S. generally accepted accounting principles (“GAAP”), practices or policies;
- regulatory or legislative changes or developments;
- the effects of unanticipated events on our disaster recovery and business continuity planning;
- failures or limitations of our computer, data security and administration systems;
- risks of employee error or misconduct;
- the assimilation of life insurance businesses we acquire and the sound management of these businesses; and
- the availability of capital to expand our business.

It is not our corporate policy to make specific projections relating to future earnings, and we do not endorse any projections regarding future performance made by others. In addition, we do not publicly update or revise forward-looking statements based on the outcome of various foreseeable or unforeseeable developments.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

Our management, with the participation of our Chief Executive Officer and Chief Financial Officer (“Certifying Officers”), has evaluated the effectiveness of our disclosure controls and procedures as defined in Rules 13a-15(e) and 15d-15(e) of the Securities and Exchange Act of 1934 as amended (“Exchange Act”) as of the end of the fiscal period covered by this Quarterly Report on Form 10-Q. Based upon such evaluation, the Certifying Officers have concluded that the Company’s disclosure controls and procedures were effective to ensure that information required to be disclosed by us in the reports we file or submit under the Exchange Act is made known to management, including our Certifying Officers, as appropriate, to allow timely decisions regarding disclosure and that such information is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission’s rules and forms.

Changes to Internal Control over Financial Reporting

There were no changes in the Company’s internal control over financial reporting during the three months ended June 30, 2018 that have materially affected, or are reasonably likely to materially affect, the Company’s internal control over financial reporting.

PART II - OTHER INFORMATION

Item 1. Legal Proceedings

A lawsuit filed by the Company and Chairman, President and Chief Executive Officer, Gregg E. Zahn, against former Company Board of Directors member Wayne Pettigrew and Mr. Pettigrew's company, Group & Pension Planners, Inc. (the "Defendants"), concluded on February 17, 2017. The lawsuit was filed in the District Court of Tulsa County, Oklahoma (Case No. CJ-2013-03385). In the lawsuit, the Company alleged that Mr. Pettigrew had defamed the Company by making untrue statements to certain shareholders of the Company, to the press and to regulators of the state of Oklahoma and had breached his fiduciary duties.

The jury concluded that Mr. Pettigrew, while still a member of the Company’s Board of Directors, did, in fact, make untrue statements regarding the Company and Mr. Zahn and committed breaches of his fiduciary duties to the Company and the jury awarded the Company \$800,000 of damages against Mr. Pettigrew. In addition, the jury found that Mr. Pettigrew had defamed Mr. Zahn and intentionally inflicted emotional distress on Mr. Zahn and awarded Mr. Zahn \$3,500,000 of damages against Mr. Pettigrew. In addition to the damages awarded by the jury, the Company and Mr. Zahn have initiated steps to aggressively communicate the correction of the untrue statements to outside parties.

Mr. Pettigrew has appealed this decision but has failed to post an appeal bond. As a consequence, the Company and Mr. Zahn are in the process of executing on the judgments against Mr. Pettigrew's assets. The Company and Mr. Zahn have so far collected some property and money in the execution process and will continue to execute on the judgments. Any money or property collected to date during the execution of the judgments are held in an escrow by a third party, have not been reflected in the June 30, 2018 consolidated financial statements and would have to be returned to Mr. Pettigrew in the event the judgments are reversed by the appellate courts.

Prior to being acquired by TLIC, FBLIC developed, marketed, and sold life insurance products known as "Decreasing Term to 95" policies. On January 17, 2013, FBLIC's Board of Directors voted that, effective March 1, 2013, it was not approving, and therefore was not providing, a dividend for the Decreasing Term to 95 policies. On November 22, 2013, a lawsuit was filed in the Circuit Court of Greene County, Missouri asserting claims against FBLIC relating to this decision. A trial was held November 27, 2017 through December 1, 2017 on the individual claims of two policyholders asserting fraud and negligent misrepresentation and on claims of a class of Missouri residents asking the Court to (1) find that the dividend provisions in the Decreasing Term to 95 policies violate Missouri law, specifically, § 376.360 RSMo.; (2) order that the policies are void ab initio; and (3) order that FBLIC return all premiums collected under these policies, plus interest and attorneys' fees.

During 2018, a settlement was reached by the parties and the Court approved the settlement agreement on June 11, 2018. FBLIC paid \$1.85 million to resolve all class and individual claims and all active Decreasing Term to 95 policies for individuals in the class will be cancelled.
